LILIA ELBA MARTÍNEZ ROSAS

Junior SOC Analyst | Cybersecurity | Biomedical Engineer

Flexible for any shift, including nights and weekends

liliaelba123@gmail.com
Native Spanish, fluent English, basic French
Central Time (UTC-6) | Relocating to Mexico

SUMMARY

Biomedical Engineer transitioning into cybersecurity, targeting Tier 1 SOC Analyst roles. Completing Fortinet NSE 1 and developing foundations in alert triage, log analysis, and incident documentation. Background in real-time troubleshooting during live neurosurgical procedures, systematic root-cause analysis of electronic faults, and client-facing communication in English and Spanish. Calm under pressure, flexible for any shift (day, evening, overnight, weekends), and fast to learn new tools.

CERTIFICATIONS & TRAINING

Oct/2026 **Fortinet NSE 1 Network Security Associate (in progress)** — **Fortinet**
Expected completion Oct/2026. Cybersecurity fundamentals: threat landscape and security basics.

EXPERIENCE

July/2023 Feb/2026 -**Property Operations Manager** — **Self-employed, Short-Term Rentals**
- Ran my own short-term rental end-to-end as my primary business, and supported operations of additional co-owned properties: reservations, vendor coordination, and client-facing communication across back-to-back bookings.
- Full financial tracking and reporting for my rental: profits, cash flow, consumables, taxes, and ROI.

January 2020 April/2022 -**Freelance Electronics Technician**
- Component-level fault diagnosis and repair: microscope-assisted SMD micro-soldering, EEPROM programming, and thermal-imaging fault detection.
- Installed firewalls, reformatted and reinstalled computers, and configured operating systems (Windows, Linux), software, and hardware.
- Communicated findings and repair status to customers from intake to delivery.

2019 **Surgical Technology Specialist** — **NEUROQUIRURGICA INTEGRAL FFMM**
- Diagnosed and resolved equipment faults in real time during live neurosurgical procedures (ZEISS surgical microscopes, Medtronic StealthStation S7 navigation, Midas Rex cranial drills), communicating clearly with surgeons under pressure.
- Preventive maintenance and in-procedure troubleshooting.

2017 - March/2018 **Research Project — IEEE EMBC Paper** — **UAM Iztapalapa - SERME clinic**
- Collected and analyzed biosignal (EEG) data with MATLAB/Octave and machine learning; wrote and presented the published paper.

SKILLS & TOOLS

Cybersecurity (in training): Fortinet NSE 1 fundamentals; threat landscape and security basics.

Scripting & Data: Python, JavaScript, C++, MATLAB/Octave; VS Code, LaTeX, Git/GitHub basics.

Analysis & Documentation: Root-cause analysis, pattern recognition, clear written documentation, English written and spoken communication.

Automation & Productivity: Zapier (task automation), daily AI-assisted workflows (Claude, ChatGPT, Gemini), Excel, Google Workspace; basic ClickUp, Trello and Notion.

Hardware & Diagnostics: SMD micro-soldering (microscope-assisted), EEPROM programming, thermal imaging, microcontrollers and FPGA boards, medical equipment maintenance; Windows/Linux installation and configuration, firewall setup.

EDUCATION

Sep/2013-2018 **Bachelor's Degree in Biomedical Engineering** — **UAM - Universidad Autónoma Metropolitana**
Professional license (Cédula Profesional) available upon request.

PUBLICATIONS

2018 **Latency and amplitude changes in cognitive event related potentials due to hemodialysis** **DOI: 10.1109/EMBC.2018.8512612**
Peer-reviewed research applying machine learning to EEG analysis. Presented at the IEEE EMBC Conference.

Interests: Taking things apart to see how they work; web development (meetbible.faith); baking; reading.
